

RK-10 SPEED BUMP

RubberForm's RK-10 Speed Bumps control traffic and reduce vehicle speeds to under 10 mph. Made from 100% American recycled scrap tire rubber, our speed bumps are the most durable and long-lasting solution on the market.

They can be strategically placed on streets or residential avenues, parking lots, construction work zones, drop-off or pick-up areas, universities, airports, or even in and around street fair events. Our speed bumps are easy to install and easily removed for road surface maintenance.

The high visibility RK-10 Speed Bumps effectively slow traffic and increase pedestrian safety in high traffic areas.

Key Features

- Easy to deploy, install, and recover
- Molded in reflective material increases visibility & safety
- Flexible – conforms to road curvature & any asphalt or concrete surface
- All-weather durability – will not warp, chip, crack, spall, or corrode
- Made in the USA with 100% American recycled rubber
